Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

\* \* \* following a block number indicates that the block number is associated with a MCD. A "1" indicates that the place is also a false MCD; the false MCD name appears in parentheses.

\* This map shows tribal census tract boundaries and numbers within the subject county; nontribal census tract boundaries are shown outside of the subject county, but without numbers. Tribal census tracts are defined by the Census Bureau as a tract defined within a federally recognized American Indian reservation or off-reservation trust land, or a tract defined within a reservation of the American Indian hierarchy, rather than by state and county. Where reservations or off-reservation trust lands cross state or county boundaries, the boundary of the reservation or trust land is assigned to the state or county of the boundary, and, if so, constitutes a single tribal census tract entity.

\* \* \* following a block number indicates that the block number is repeated elsewhere in the block.
